NOUNS

Nouns decline in accordance with one of the five declensions.

First Declension	Singular	Plural
Nominative	-a	-ae
Genitive	-ae	-ārum
Dative	-ae	-īs
Accusative	-am	-ās
Ablative	-ā	-īs
Vocative	-a	-ae

Most nouns of the first declension are feminine. Two common exceptions are *nauta* and *agricola,* which are masculine and must be modified according to their grammatical gender, e.g., *Nauta bonus est (The sailor is good).*

Second Declension	Singular	Plural
Nominative	-us, -os, -er, -r; N: -um	-ī; N: -a
Genitive	-ī	-ōrum
Dative	-ō	-īs
Accusative	-um, -on	-ōs; N: a
Ablative	-ō	-īs
Vocative	-e, -er; N: -um	-ī; N: -a

- Most names of the second declension are masculine (those ending in **-um** are neuter). Exceptions include names of 1) trees, plants, and many jewels; 2) cities, countries, and islands, which are feminine.
- The vocative of nouns whose nominative singular ends in **-us** will have a final **-e** (e.g.: *amīcus, amīce*).
- Proper nouns in **-ius** lose **-us** in the vocative (*fīlius* has vocative *fīlī; genius* has *genī; meus* has *mi,* and sometimes *meus,* in the vocative).

Third Declension	Singular	Plural
Nominative	— (-is,- ēs, -er); N: —(-e, —)	-ēs; N: -a (-ia)
Genitive	-is	-um, (-ium)
Dative	-ī	-ibus
Accusative	-em (-em, -im); N: — (-e, —)	īs, -ēs (īs, ēs); N: -a (-ia)
Ablative	-e (-e, -ī)	-ibus
Vocative	— (-is, -ēs, -er); N: —(-e, —)	-ēs; N: -a (-ia)

[the endings in the parentheses apply to i-Stems]

I-Stems are recognized as follows:
A. If a third declension noun is feminine or masculine, 1) its nominative and genitive singular forms must have the same number of syllables AND they must end in **-is** or **-ēs;** or 2) its nominative must end in **-s** or **-x,** and its base must end in two consonants.
B. A neuter third declension noun is an i-Stem if its nominative singular ends in **-al, -ar,** or **-e.**

Fourth Declension	Singular	Plural
Nominative	-us; N: -ū	-ūs; N: -ua
Genitive	-ūs	-uum
Dative	-uī, -ū; N: -ū	-ibus, -ubus
Accusative	-um; N: -ū	-ūs; N: -ua
Ablative	-ū	-ibus; -ubus
Vocative	-us; N: -ū	-ūs; N: -ua

- Most nouns of the fourth declension ending in **-us** are masculine, those in **-ū** are neuter.

Fifth Declension	Singular	Plural
Nominative	-ēs	-ēs
Genitive	-ēī, -eī	-ērum
Dative	-ēī, -eī	-ēbus
Accusative	-em	-ēs
Ablative	-ē	-ēbus
Vocative	-ēs	-ēs

- Nouns of the fifth declension are feminine except for *diēs,* which can be masculine, and *merīdiēs.*

FURTHER NOTES ON NOUNS

- A noun's declension is determined by its genitive case.
- To decline a noun, drop the ending of the genitive singular case to find the base and add to it the appropriate case ending.
- The nominative and accusative cases of ALL neuter nouns are IDENTICAL.
- The vocative case is identical to the nominative in all nouns EXCEPT those of the second declension (see note under the second declension table).

ADJECTIVES

There are **two types of adjectival declensions**: one follows the first and second declension, the other, the third declension. The rule for **declining adjectives** is the same as that for nouns: drop the genitive ending and add the appropriate case ending.

FIRST AND SECOND DECLENSION ADJECTIVES

Adjectives in this category decline just like nouns of the first and second declension. Remember that adjectives do not have a gender of their own but take on that of the noun they modify (are paired with). So for instance, the adjective meaning *good* is either *bonus, bona,* or *bonum.* If the noun it is to modify is masculine, as in *puer,* then the pairing is *puer bonus.* If the noun is feminine, as in *puella,* the pairing becomes *puella bona.*

A. Superlative adjectives:
1. Most decline like first and second declension adjectives; to form them, drop the genitive singular and add **-issimus, -issima,** or **-issimum.**
2. Six adjectives ending in **-lis** form the superlative by adding **-limus, -lima, -limum** to the base (found after dropping the genitive singular ending). They are: *facilis, -e; difficilis, -e; similis, -e; dissimilis, -e; gracilis, -e;* and *humilis, -e.*
3. Any adjective whose masculine nominative singular ends in **-er** forms the superlative by adding **-rimus** DIRECTLY to the NOMINATIVE (not genitive) singular ending in **-er.**

B. Pronominal adjectives (*alius, other; ūllus, any; nūllus, none; sōlus, alone; tōtus, whole; ūnus, one; alter, the other; uter, which (of two); neuter, neither*) decline like first and second declension adjectives EXCEPT in the genitive and dative singular, where the endings are, respectively, **-īus** and **-ī.** Note that these pronominal adjectives all have to do with quantity.

Tōtus, whole	Masculine	Feminine	Neuter
Nominative	tōtus	tōta	tōtum
Genitive	tōtīus	tōtīus	tōtīus
Dative	tōtī	tōtī	tōtī
Accusative	tōtum	tōtam	tōtum
Ablative	tōtō	tōtā	tōtō
Vocative	tōte	tōta	tōtum

THIRD DECLENSION ADJECTIVES

- Third declension adjectives are divided according to the number of endings in the nominative singular, namely, one, two, or three.
- All adjectives of this type are i-stems.

A. Adjectives of three endings:

ācer, -cris, -cre (s.)	Masculine	Feminine	Neuter
Nominative	ācer	ācris	ācre
Genitive	ācris	ācris	ācris

Ablative	ācrī	ācrī	ācrī
Vocative	ācer	ācris	ācre

Accusative	ācrīs (ēs)	ācrīs(ēs)	ācria
Ablative	ācribus	ācribus	ācribus
Vocative	ācrēs	ācrēs	ācria

B. Adjectives of two endings:

omnis, -e: all (sg.)	Masc. & Fem.	Neuter
Nominative	omnis	omne
Genitive	omnis	omnis

Nominative	omnēs	omnia
Genitive	omnium	omnium
Dative	omnibus	omnibus
Accusative	omnēs(-īs)	omnia
Ablative	omnibus	omnibus
Vocative	omnēs	omnia

- **Comparative adjectives** decline like two-ending adjectives EXCEPT in the ablative singular where final **-e** is used instead of **-ī.**
- Comparative adjectives are formed by dropping the genitive singular ending and adding **-ior** in the masculine and feminine, and **-ius** in the neuter, the genitive being **-iōris.**
- Some adjectives have irregular comparative formations and are best simply memorized; the more frequent ones are: *melior, -ius, better* (from *bonus, -a, -um*); *māior, -ius, greater* (from *magnus, -a, -um*); *pēior, -us, worse* (from *malus, -a,-um*); *plūs, more* (which is a neuter noun in the singular and is from *multus, -a, -um*); *minor, -us, smaller* (from *parvus, -a, -um*); *prior, -ius,* 'former' (from the preposition *prae, prō*); and *superior, -ius, higher* (from *superus, -a, -um*).

C. Adjectives of one ending:

Accusative	simplicīs(-ēs)	simplicia
Ablative	simplicibus	simplicibus
Vocative	simplicēs	simplicia

- **Present participles** decline like adjectives of one ending.
- Present participles are formed from the second principal part. Note that in the ablative singular final **-ī** is found when the participle is used as an adjective; final **-e** when used as a noun or verbal noun.

stō, stāre, stetī, stātum: to stand	Masc., Fem., N.	
	Singular	Plural
Nominative	stāns	stantēs, N: stantia

Dative	stantī	stantibus
Accusative	stantem, N: stāns	stantēs(-īs), N: stantia
Ablative	stantī(-e)	stantibus
Vocative	stāns	stantēs, N: stantia

LATIN GRAMMAR

ADVERBS

A. Adverbs formed from first and second declension adjectives:
These adverbs add **-ē** to the base (after the genitive singular ending has been dropped). e.g.: *cārus* produces *cārē*. Note that the common adverbs *male* (from *malus*) and *bene* (from *bonus*) have a final SHORT **-e**. Note too that some adverbs of this formation are lacking an adjective, e.g., *ferē* and *fermē, almost.*

B. Adverbs (mostly, but not exclusively) formed from third declension adjectives:
These adverbs add **-ter** or **-iter**, e.g., *graviter, heavily* (from *gravis, -e*); *hūmāniter, humanely,* but also *hūmānē* (from *hūmānus, -a, -um*).

C. Adverbs with other types of endings:
- **-ō,** e.g., *prīmō, at first* (from *prīmus*)
- **-ā,** e.g., *aliā, otherwise* (from *alius*)
- **-tim,** e.g., *prīvātim, privately* (from *prīvātus*)
- **-um,** e.g., *multum, much* (from *multus, -a, -um*)
- **-am,** e.g., *clam, secretly; palam, openly; tam, iam, quam*
- **-tus,** e.g., *funditus, from the bottom*

D. Comparative degree of adverbs:
The comparative form of most adverbs is simply the neuter **-ius** form of the comparative degree of the adjective, e.g., *facilius, more easily; plūs, more.*

E. Superlative degree of adverbs:
The superlative form of most adverbs derives from the superlative form of the adjective: drop the case ending and add **-ē** instead, e.g., *ācerrimus* gives *ācerrimē.*

DEMONSTRATIVE (NON-REFLEXIVE THIRD PERSON) PRONOUNS

PARTICIPLES

PARTICIPLES		**cantāre:** to sing	
	Present	Perfect	Future
ACTIVE	cantāns	—	cantātūrus, -a, -um
PASSIVE	—	cantātus, -a, -um	cantandus, -a, -um

A. **Formation:** present participles are formed from the present stem; the future participle, from the supine stem; the perfect, from the perfect stem. **This holds true for participles of ALL conjugations.**
B. Regular verbs (in contrast to deponent verbs) have NEITHER present passive NOR perfect active participles.
C. **Declension:** participles are verbal adjectives and therefore decline. Only the present participle declines according to the third declension; all other participles follow first and second declension.

THE GERUNDIVE

A. The gerundive, like the participle, is a verbal ADJECTIVE. It can approximate the future passive participle's meaning.
B. The gerundive is used either like a simple adjective (e.g., *carmen cantandum, a song to be sung*) or in the passive periphrastic conjugation, which consists of a gerundive, as a predicate adjective, agreeing with the subject of a conjugated form of *sum* (e.g., *hoc carmen cantandum est, this song should be sung*). In either case, the gerundive connotes necessity, duty, or obligation (your translation should convey that idea).
C. A gerundive phrase is often substituted for a gerund phrase without any of the gerundive's usual sense of duty, etc. Latin often has *carmine cantandō mē dēlectat* instead of *carmen cantandō mē dēlectat*, although both mean *by singing a song he delights me.*

THE GERUND

A. The gerund is a verbal **noun** formed from the gerundive. It can approximate the future passive participle's meaning.
B. But unlike the gerundive, the gerund has only FOUR forms: the neuter singular genitive (*cantandī, of singing*), dative (*cantandō, to/for singing*), accusative (*cantandum, singing*), and ablative (*cantandō*).
C. Note that Latin does not have a nominative form of the gerund; the infinitive is used instead.
D. All the forms of the gerund are ACTIVE.
E. Latin AVOIDS the use of a gerund governing an accusative of direct object, e.g., *exercitātiō cantandī carmina, the practice of composing songs.* It prefers to use the gerundive; note, however, that the translation remains THE SAME, e.g., *exercitātiō carminum cantandōrum.*
F. The gerundive or gerund indicates purpose in two ways:
   1. *ad* + accusative gerund or gerundive phrase, e.g., *Vīvō ad carmina cantanda, I live to sing songs.*
   2. *causā* used postpositively after the noun it governs + the genitive gerund or gerundive phrase, e.g., *Vīvō cantandī carmina causā, I live to sing songs.*

THE SUPINE

The supine is a verbal NOUN that occurs only in the neuter accusative and ablative singular.

A. The accusative supine is used with a verb of motion to express purpose, or when motion is implied, e.g., *Vēnimus carmina cantātum, we came to sing songs.*

B. The ablative supine is used in a locative or dative construction after some adjectives in the **ablative of respect** construction, e.g., *hoc carmen mīrābile est cantātū, this song is wonderful for singing/in the singing.*

SECOND CONJUGATION

Present stem ends in **-ē**, infinitive in **-ēre.** All tenses form like first conjugation verbs (with different vowel stem) unless otherwise noted. *praebeō, praebēre, praebuī, praebitum: to offer*

THE INDICATIVE

PRESENT		**praebēre:** to offer
	Active	**Passive**
1PS	praebeō	praebeor
2PS	praebēs	praebēris *or* -re
3PS	praebet	praebētur
1PP	praebēmus	praebēmur
